DETAILED ACTION

1. Claims 1-3, 5-9 & 11 are now pending.

Claim Objections

2. Claim 11 is objected to because of the following informalities:

Claim 11, line 7: “the tilt initialization” should be --a tilt initialization--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3 & 5-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 1, lines 2-3 recite “detecting a track of a focus error at the maximum value of an RF signal or at the minimum value of jitter”. It is unclear how this step is interrelated with the rest of the steps in the claim, and therefore, it is unclear how this step is utilized to control tilt.

In regard to claim 2, lines 2-3 recite “calculating a variation per track of the maximum value and the minimum value of the focus error to detect a normalized DC component”. It is unclear how this step is interrelated with the steps recited in claim 1, and therefore, it is unclear how this step is utilized to control tilt.

In regard to claim 3, line 2 recites “the variation per track”. It is unclear whether this limitation refers to the “variation per track of the focus error” recited in claim 1, or the “variation

per track of the maximum value and the minimum value of the focus error” recited in claim 2, rendering the claim indefinite.

Claims 5-9 are dependent upon claim 1.

Allowable Subject Matter

5. Claim 11 is allowed over the prior art of record.
6. Claims 1-3 & 5-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
